

RETURN-TO-PRODUCTIVITY SERVICE PROGRAM

Special Repair Service for Older Servo Valves

The Moog Return-To-Productivity Program gives customers who may rely on older or obsolete valves a higher level of maintenance and repair at a value price.

OVERVIEW

More than one million Moog Servo Valves have been put into service since 1950. The Moog Return-To-Productivity Program is designed to provide basic repair and evaluation of your older and obsolete Servo and Proportional Valves that could previously not be serviced. Now, customers who want to experience the performance benefits of Moog OEM factory repair with virtually no risk can tap our Level A repair service for products not previously eligible.

The program includes refurbishment of the original valve including clear repair documentation and a warranty. And because it's delivered by the professionals who designed your Moog Servo Valves, you're assured of total confidence that all services are done right.

In fact, if after testing and evaluation, your valve cannot meet performance specifications, we will work with you to provide preferential pricing on an upgraded replacement valve.

It's the ideal program for maintenance professionals who want to get more productivity from their older and obsolete Moog Servo Valves, and see just how effective Moog OEM factory repair can be.

BENEFITS

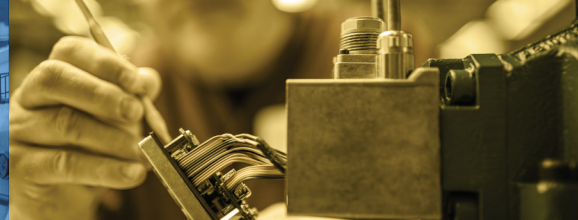

- All Moog valves, including obsolete models, serviced to a Moog factory Level A
- Moog professional repair documentation and warranty for every valve serviced
- Moog expert recommendations for higher level of service or valve upgrade options to optimize performance and extend life
- Special pricing when upgrades or trade-ins are recommended
- Simple administration—one purchase order for all valves in your installed base

Our Level A Repair Service for Obsolete Valves is ideal for Moog customers who rely on older products in their industrial machines.

MOOG

EXPERIENCE THE VALUE OF MOOG GLOBAL SUPPORT

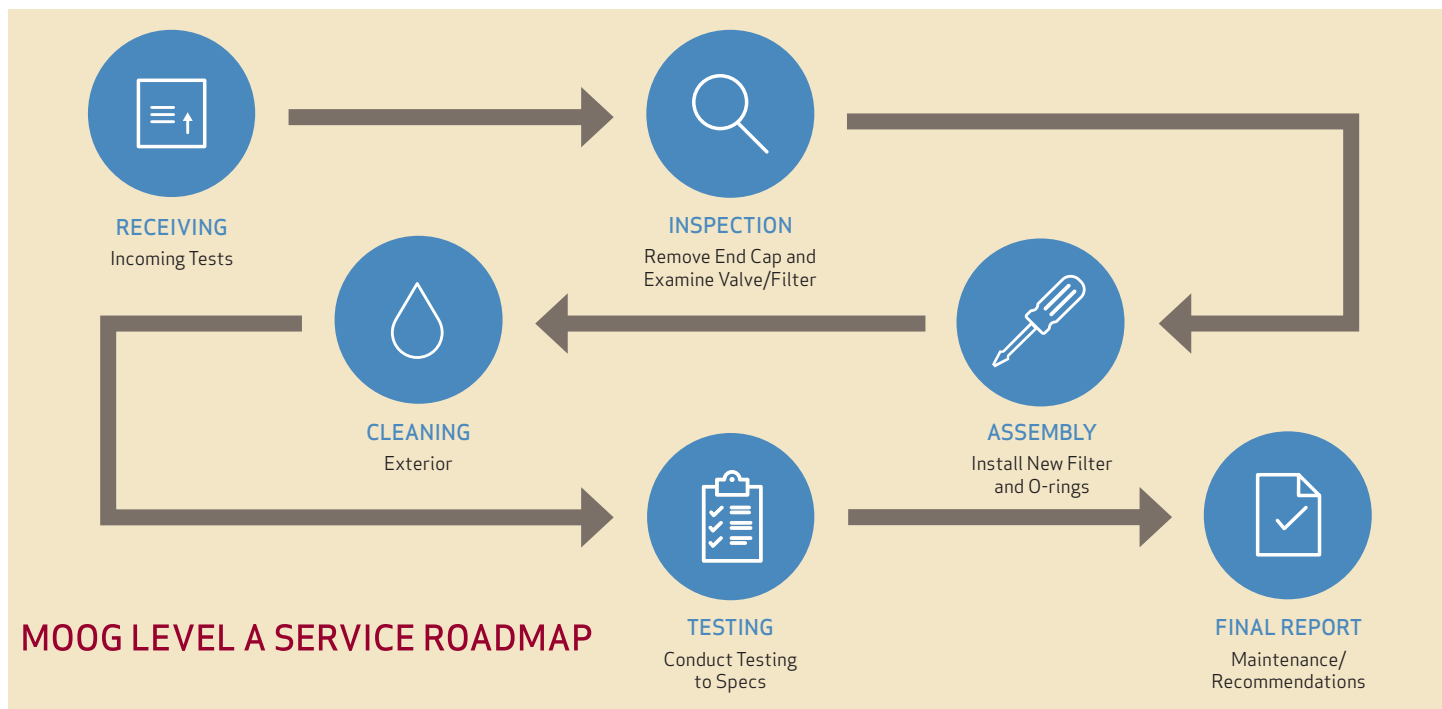

The Moog Return-To-Productivity Program helps customers extend the life of older Servo and Proportional Valves without a major commitment.

The program offers simple, no-hassle process with Moog Industrial Services or your authorized Moog distributor. If your older product can no longer meet performance specifications, our engineers will recommend a replacement product that you can purchase at preferential pricing. A professional evaluation service with options for the latest technology helps you make the best decision to protect your investment.

LOWER YOUR TOTAL COST OF OWNERSHIP

Moog Global Support is designed to help lower your total cost of ownership by ensuring your Moog Servo and Proportional Valves perform like new, without the risks and compromises associated with unauthorized repair houses that don't have access to Moog repair specifications or original components.

The Return-To-Productivity Program reflects our commitment to providing customers the same excellent service value on older products that we deliver to customers around the globe for all of our products.
